

## Structure

### Information Architecture

The page will be divided into sections.

Section About Me will be linked to three pages!

### Interaction Design (IXD)

- Social Media icons will open a new window(\_blank) so the user can access it without losing connection to the out page. Icons will be placed on top of the home page, but only at the bottom of the Adventures, Experience and Gallery Page.
- Every time a user hover over our navigation menu, it will increase size, (scale) to let the user know he can select any page.
- Contact us send button will also increase its size once the users click on it.
- Each photo in the gallery page contains an effect, once the user clicks on it, they should be able to see only one increased image and left and right arrow.
